

Recipients :	Stoneridge Importers' Network & End-Users
Release date :	April 19 <sup>th</sup> , 2024
Update Purpose :	Initial release
Object :	SCANIA Smart 2 retrofits

European Commission voted on the Mobility Package I, which includes mandatory retrofits to Smart 2 Tachographs for international transport.

### **SCANIA Smart 2 retrofits**

SCANIA recommends a Truck/SOPS conversion from 1B or Smart 1 to Smart 2, when replacing the Tachograph in the frame of the Mobility Package retrofits.

However, this conversion file is not available for all models/manufacturing years, specifically up to MY2012.

We can confirm after discussions with SCANIA Headquarters that retrofitting the Tachograph to a Stoneridge Smart 2 without converting the truck/SOPS is possible for all models/year and will have no functional impact to the driver. SCANIA Diag Tool will simply report unknown ECUs, but without preventing diagnostics being run.
